DETAILED ACTION

Claim Objections

Claims 19, 21 objected to because of the following informalities: Dependent claims should immediately follow the claim on which it is directly dependent, i.e. claim 17.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the specified anions, does not reasonably provide enablement for anions in general. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims. The applicant broadly claims a colloidal copper which by the claim definition can contain any anion and does not have to be an anion chosen from "A" but can consist solely of "B". However, the Specification only provides a limited number of working examples of "A" and none of "B". The prior art appears to indicate that not all copper salts will produce colloidal copper (US Pat. 4,681,530, Column 7, lines 43-60). As such, it appears that one of ordinary skill in the art would be required to do undue experimentation in order to determine what other anions would be suitable either in combination of the "A" anions or alone.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A claim ends with a period and may not contain a period elsewhere in the claim except to identify an abbreviation. See MPEP 608.01(m). Claim 1 and Claim 9 contain a period after " $0 \leq y \leq 2$ " such that it is uncertain whether the subject matter following are limitations of the claim. Because claims 2-8, 17, 19, 21 are dependent on claim 1, and claims 10-16, 18, 20, 22 and do not cure the rejection said claims are also rejected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Brasch (US Pat. 4,681,630).

Brasch expressly discloses a colloidal copper prepared from copper sulfate pentahydrate and method of preparing the same falling within the scope of applicant's claims (Column 6, lines 40-66). Examiner notes that claims 1-8 are drawn to a composition, as such, although the

Art Unit: 1616

process of making the composition is different in certain aspects, since the composition appears to be the same, i.e., a copper colloid, the prior art composition appears to anticipate the composition claims.

Alternatively, at the very least the claimed invention is rendered obvious within the meaning of 35 USC 103, because the prior art discloses products and uses that contain the same exact ingredients/components as that of the claimed invention. See *In re Fitzgerald*, 205 USPQ 594 (CCPA 1980). See also *In re May*, 197 USPQ 601, 607 (CCPA 1978) and *Ex parte Novitski*, 26 USPQ2d 1389, 1390-91 (Bd Pat. App. & Inter. 1993).
